Journey

Jun 2023 - Present

Product Designer - Buldium, a Realpage Company

- Designed Agentic AI experiences across onboarding, activation, oversight and workflow control.
- Explored human oversight, AI transparency and decision boundaries in autonomous B2B workflows.
- Conducted customer research, usability testing and design exploration for complex product workflows.
- Designed and evolved eSignature workflows across multiple product releases, including non-lease document use cases.
- Collaborated closely with Product, Engineering and UX partners across discovery, design review and implementation.
- Created interaction models, prototypes and system-level flows for complex multi-actor experiences.

Key projects: Agentic AI, eSignatures, AI-assisted renewal workflows

Sep 2022 - May 2023

UX & UI Designer - Namecheap

- Collaborated with cross-functional teams to design product features aligned with business and user needs
- Built scalable design components and product flows within the company design system
- Conducted design reviews and usability evaluations to improve product clarity and efficiency
- Created wireframes, prototypes and journey maps to structure complex product experiences

Independent Writing

Exploring AI, human autonomy, technology and product design.
